

## MC5™ RAPIDFLUSH System CLEANER

High performance MC5 RapidFlush System Cleaner is an advanced strength system cleaner designed to work with ADEY's award winning *MagnaCleanse*™ process, effectively removing hydronic heating system sludge, debris and scale while delivering exceptional cleaning results in a short space of time. Suitable for use in all hydronic heating and cooling systems.

- Advanced strength formula
- Recommended for *MagnaCleanse* flushing and power-flushing
- Restores system efficiency
- Removes sludge, debris including flux residues and scale
- Suitable for all heating systems
- Environmentally friendly

---

### Physical and chemical properties

Appearance:	Liquid
Colour:	Pale amber
Odour:	Slight
Solubility:	Fully miscible
pH (concentrated solution):	6-7
Density:	1.18 g/cm <sup>3</sup>

---

### How to Use

16.8oz liq of MC5 will provide effective treatment for a typical 26 gal / ten radiator system. Introduce MC5 into the system using the *MagnaClean*™ canister to dose. Alternatively, dose via the purge and fill point or radiator using a suitable injector. Circulate in the system for a minimum of one hour at normal operating temperatures. MC5 can be left in the system for up to seven days.

When using MC5 in conjunction with *MagnaCleanse*, the heating system heats the chemical, enhancing performance making the system cleansing process faster and more efficient. After cleaning, the system should be drained and flushed thoroughly.

Refill and provide long-term protection with ADEY's MC1+™ Protector.

---

### Product uses

Removing hydronic heating system sludge, debris and scale, MC5, effectively cleans hydronic heating systems and can be left in the system for up to seven days. In a shorter circulation period, MC5 is designed to work with ADEY's award winning *MagnaCleanse* process. For new systems ADEY MC5 is ideal for removing flux residues and other installation debris to help extend the life of the boiler and maintain the efficiency of the system.

---

### Application

MC5 is suitable for all hydronic heating systems, old and new.  
MC5 is not suitable for use in potable water systems.

---

### Packaging, handling and storage

Available in 16.8oz liq plastic containers. MC5 is non-hazardous and while providing effective treatment, is non-toxic and biodegradable. However, as for all chemicals, keep out of reach of children. Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep only in the original container.
